

EMOHA™

#EldersFirst

India's Most Trusted Senior Care Brand

Healthy Ageing

Greater Independence

As we grow older, some things can start to change.

A walk may not feel as easy as it once did. Balance may need more attention. Energy may dip. Health may need closer monitoring. And sometimes, we may feel less like stepping out, meeting people or doing the things we enjoy.

But growing older shouldn't mean putting life on hold.

Emoha helps you stay on top of your **physical health, emotional wellbeing and everyday needs**, so you can get the right support early and continue doing more of what makes you happy.

Whether it's staying active, meeting friends, pursuing a hobby or simply enjoying your daily routine, **the goal is to help you stay healthy, confident and independent.** Because every stage of life deserves to be lived fully.

AB Khulke Jiyo!

What Is Emoha?

Emoha is a trusted senior care brand in India, helping seniors live healthier, safer and more fulfilling lives at home.

With 30+ years of combined geriatric care experience, Emoha brings together personalised, doctor-supervised care with dedicated care coordination.

From health and safety to everyday support and emotional wellbeing, we bring together the care and support seniors need through one coordinated care experience.

Why Families **Trust Emoha**

Assessment-led Care: We first understand your health, mobility, daily needs and overall wellbeing to recommend the right care and support for you.

Doctor-supervised Care: A geriatric doctor oversees your care, helping ensure your health needs are addressed at every stage.

Care Coordinator: A dedicated Emoha Daughter coordinates doctors, nurses, diagnostics, medicines, emergency support and follow-ups, so you have **one person to turn to for your care needs.**

Proactive Monitoring: We regularly check on your health and changing needs, helping spot concerns early and act before they become bigger problems.

For Employee Eldercare Benefits

Assessment first. Recommendation second.

Emoha's ABC Framework helps ensure seniors receive care that is assessed, personalised and coordinated so they get the right support at every stage.

Assessment

A comprehensive geriatric assessment helps us understand a senior's health, mobility, daily needs and overall wellbeing, including where support may be needed.

Blueprint of Care
Based on the assessment, a geriatric doctor-supervised care plan is created around each senior's specific needs, preferences and goals.

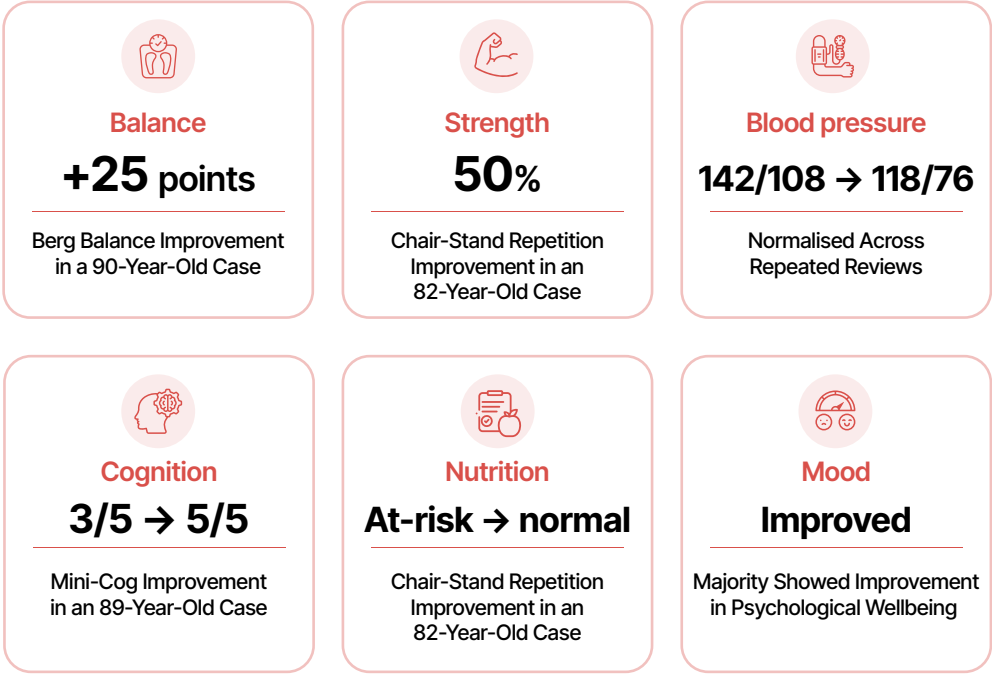

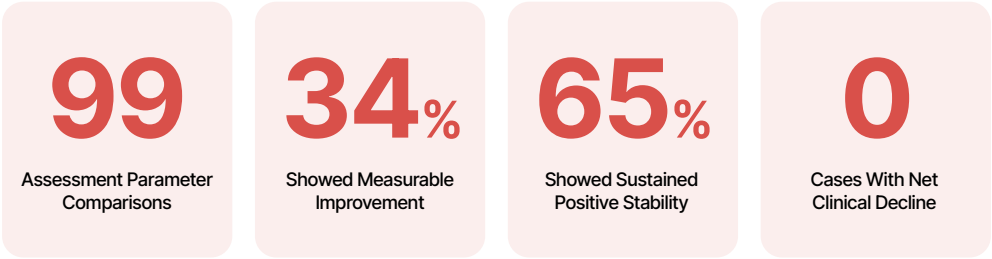

Coordination

A dedicated Emoha Daughter coordinates appointments, care services and follow-ups, while keeping track of changing needs.

Care That Tracks Outcomes, Not Just Activity

Seniors on the Empower plan show consistent health improvement & stability across key health parameters, helping reduce their risk of emergencies.

Evidence Note: This is an observational, non-controlled case series. The findings cannot be attributed to any single intervention with statistical certainty, and individual outcomes may vary.

Four Levels of Care

One Geriatric Care Framework.

The recommended plan reflects the elder's current risk, clinical needs and desired level of proactive support.
